LOS ANGELES FIRE DEPARTMENT

BFC 06-106

WILLIAM R. BAMATTRE
FIRE CHIEF

RECEIVED
NOV 14 2006
CITY OF LOS ANGELES
BOARD OF FIRE COMMISSIONERS

November 1, 2006

TO: The Honorable Board of Fire Commissioners
City of Los Angeles

FROM: William R. Bamattre, Fire Chief

SUBJECT: FIRE DEPARTMENT STATISTICS FOR THIRD QUARTER 2006

Attached is a statistical summary of Fire Department emergency incidents, responses and response times during the three-month period of July, August and September 2006.

The information is derived from the field data that Department members have entered into the National Field Incident Reporting System (NFIRS), and the dispatch records and field status entries into the Fire Command and Control System.

The attached report is provided for your review and interest.

Respectfully submitted,

William R. Bamattre

WILLIAM R. BAMATTRE
Fire Chief

FIRE CHIEF

STATISTICS for Third Quarter 2006

Prepared by the Planning Section

LOS ANGELES FIRE DEPARTMENT

QUARTERLY STATISTICAL REPORTS

The following statistical reports are provided for your information:

- Daily Emergency Incidents
- Dispatched EMS Incidents
- EMS Dispatch Categories
- EMS Transports
- Average Daily Fire Incidents
- Resource Workload Analysis
- Engine Company Monthly Workload
- Light Force Monthly Workload
- Paramedic Ambulance Monthly Workoad
- Paramedic Ambulance Daily Workload
- BLS Ambulance Monthly Workload
- BLS Ambulance Daily Workoad
- Battalion Chief Workload
- EMS Battalion Captain Workload
- Average Time Spent on each Response
- Quarterly Incidents and Responses List
- Quarterly Incidents and Responses Charts
- EMS Incidents Chart
- Hospital Transports
- Response Times by Division and Citywide:
    - First Unit on scene Structure Fires
    - First Unit on scene ALS High-Risk incidents
    - First ALS Unit on scene ALS High-Risk incidents
    - First ALS Ambulance on scene ALS High-Risk incidents
    - First Unit on scene BLS Incidents
    - First Unit on scene other Fires
- Response Time percentages of first resources on scene (4 pages)
- Paramedic Response Times to ALS incidents
  in districts recently receiving a second paramedic resource

Prepared by Captain Wells, LAFD Planning Section on 11-01-06.

LOS ANGELES FIRE DEPARTMENT

RESOURCE WORKLOAD ANALYSIS

The Fire Department's Strategic Plan for Fire Facilities and Resource Deployment is a plan designed for the management of Fire Department facility modifications and resource deployment necessary to accomplish the Fire Department's mission to the Year 2009. The Strategic Plan contains criteria for the deployment of resources. Workload is one criterion, along with response times, simultaneously occurring incidents, and land use. In an effort to maximize performance and minimize response times, control of resource workload is very important.

In April 1988, the City Administrative Office (CAO) completed a Management Audit of the Fire Department Paramedic Service. The Audit reviewed the Fire Department's entire EMS system. Based on this analysis, the CAO recommended maximum emergency response workloads for Paramedic rescue ambulance resources. Further, the Fire Department presented workload guidelines for other Fire Department resources which were accepted by the CAO. The recommendations were intended to prevent the degradation of medical services caused by excessive workloads. The maximum recommended workloads are as follows:

- Engine (Single-Engine Station) — **240** maximum responses per month (240 monthly = 7.8 per shift)
- Engine (Task Force Station) — **300** maximum responses per month (300 monthly = 9.8 per shift)
- Paramedic Rescue Ambulance — **350** maximum responses per month (350 monthly = 11.4 per shift)
- BLS (EMT) Rescue Ambulance — **420** maximum responses per month (420 monthly = 13.7 per shift)

Based on the number of responses during **July, August and September of 2006, the following Department resources are exceeding the workload guidelines:**

- Engine companies at single-engine stations (**17**):
  Engines 6, 13, 21, 41, 43, 46, 51, 52, 57, 59, 62, 65, 68, 81, 82, 91, Light Force 102

- Engine companies at task force stations (**12**):
  Engines 7, 9, 209, 11, 15, 33, 37, 39, 58, 64, 66, 89

- Paramedic Rescue Ambulances (**10**):
  Rescues 9, 209, 33, 34, 46, 57, 64, 66, 81, 94

- BLS Rescue Ambulances (**5**):
  Rescues 811, 833, 846, 864, 866

With the addition of 32 Paramedic RA's since January 2001, the number of Paramedic RA's exceeding the workload guidelines has been reduced from <u>22</u> to just <u>10</u>.
