RE: Letter of Support for the Transgender, Gender Expansive, and Intersex (TGI) Housing Initiative (HI)

Honorable Members of the City Council

The Los Angeles City Health Commission wishes to express our collective support for the TransLatin@ Coalition's (TLC) **TGI HI**. As an advisory body dedicated to safeguarding the health, safety, and well-being of all Angelenos, this Commission recognizes that housing stability is a fundamental driver of health outcomes.

Data from the UCLA Williams Institute's 2023 Trans and Nonbinary Survey indicates that local TGI individuals face compounding barriers to healthcare, employment, and safe living environments in Los Angeles County [1]. Additionally, the National Transgender Survey notes that approximately 1 in 3 transgender individuals experience homelessness in their lifetime. These systemic inequities create severe health disparities that must be addressed through targeted, preventative public action.

The TGI HI offers a comprehensive, community-led framework to prevent homelessness before it starts. By optimizing up to **$20 million** in available housing, administrative, and local funding streams, this initiative establishes a critical, culturally responsive social safety net. We strongly support the initiative's multi-pillared strategic approach:

- **Preventive Financial Aid:** Allocating funds directly to Emergency Rental Assistance and Flexible Financial Assistance helps stabilize rent-burdened households facing sudden medical, transit, or economic crises.

- **Culturally Responsive Navigation:** Deploying dedicated housing navigators addresses severe language, documentation, and systemic navigation barriers that currently leave vulnerable populations under-resourced.

- **Intersectional Priority System:** Utilizing a tiered framework ensures that the most vulnerable, including TGI people, seniors, people with disabilities, system-impacted individuals, and undocumented immigrants, receive immediate, prioritized relief.

DRAFT

Stable housing is essential for managing mental health, accessing chronic medical treatment, and ensuring personal safety. Securing resources for trusted, community-led organizations like the TLC is a vital investment in our region's public health infrastructure.

The Los Angeles City Health Commission strongly urges all stakeholders, funding administrators, and municipal leadership bodies to fully support and invest in this critical initiative.

Sincerely,

Dr. Nomsa Khalfani, Ph.D., President
Los Angeles City Health Commission
