Recommendation for Council action, as initiated by Motion (Hernandez, McOsker - Blumenfield):

INSTRUCT the Board of Public Works' Office of Petroleum and Natural Gas Administration and Safety, with the assistance of the City Administrative Officer (CAO), and in consultation with, but not limited to, the Department of City Planning, Los Angeles Fire Department (LAFD), Los Angeles Department of Building and Safety (LADBS), City Attorney, and any Council Office/Mayor's Office, to report to Council in 90 days on recommendations on instituting best practices relative to oil and gas uses in the land use regulatory process, in addition to solutions to protect the health and safety of residents from developments built over oil wells. The report should include the following information:

a. An assessment of the following:

- i. Existing City enforcement practices for oil and gas regulation for development/redevelopment and recommendations to augment enforcement efforts.
- ii. Land use requirements for remediation on residential and commercial properties.
- iii. Identify accomplishments, challenges, and opportunities for improvement in the City's regulation of oil well site redevelopment.

- b. Recommendations on how to improve development standards to ensure developers fully locate any oil wells on a property.

- d. Gather summaries of all existing methane mitigation requirements and all well abandonment standards from LADBS and LAFD and describe recommendations for additional City enforcement actions for when methane emissions leaks occur at these oil well sites.
- e. Research and determine the feasibility for design regulations and development standards for new construction in proximity to active, idle, plugged and/or abandoned oil wells. The research and feasibility of the design regulations and development standards should include a discussion with regards to: new residential development near active oil well facilities including specific design standards to minimize exposure to any active oil well site operations (e.g. landscaping screening, enhanced air quality filter requirement).
- f. Research and determine the feasibility of a potential process to require ongoing methane gas monitoring for new multi-family residential buildings developed on oil well properties following a Certificate of Occupancy for the development. This would also include the feasibility of requiring quarterly reports by the property owner related to methane alarm activity and methane gas measurements for the multi-family development.
- g. Develop a Citywide oil well advisory notice embedded in ZIMAS and establish appropriate distance regulatory controls to guide development in close proximity to active, idle, plugged and/or abandoned oil wells. The notice should include a description of the potential safety,

environmental, and public health risks associated with redevelopment on or adjacent to oil well sites, potential design and constructions standards for when an oil well site is redeveloped, and a list of responsible agencies to contact in case of oil well nuisance concerns.

- i. Create a proposal to update any City related oil expert bench to include an expert on historic wells in order to comply with the City's existing development regulations and recommendations to ensure developers use historic oil experts.
- j. Recommendations creating a Citywide standard procedure to report new discoveries of historic and buried oil wells, to the California Geological Energy Management Division (CAL GEM).
- k. Create recommendations to integrate community input and expertise on site history that may not be captured by existing Cortese List databases (e.g. Department of Toxic EnviroStor or other databases), including but not limited to community meetings and listening sessions for new development.
- l. Develop a process to inform local constituents and community residents about oil spills in their neighborhoods that are commercially feasible in existing oilfield practices.
- m. Report back on the impact of the most recent Local and State streamlining efforts implemented to expedite the development of housing (e.g. Executive Directive 1, State

MOTION

On May 6, 2025, the Board of Fire Commissioners acted to approve an agreement with Clean Harbors Environmental Services, Inc. (Clean Harbors), for hazardous materials waste management services pursuant to a Request for Proposals (RFP). A proposal for a five-year contract with this vendor for this purpose was previously negotiated and sent to the Council for approval in April 2025 (see Council File Number 25-0166). However, this contract was disapproved due to concerns with Clean Harbors' business practices.

In response, the Fire Department renegotiated its agreement with Clean Harbors to include a shorter term and lower contract ceiling, which does not require Council approval. The revised agreement is for two years commencing July 1, 2024, and terminating June 20, 2026, and includes an optional one-year extension. The total not-to-exceed amount of the Contract is \$1,400,000, subject to the availability of funds in the Fire Department budget for this purpose, with an additional \$700,000 authorized if the Department exercises its option to extend.

However, there are still concerns with Clean Harbors' business and environmental practices, and a contract with this firm may not be advisable. Council action is needed to assert jurisdiction over the Board's action to allow further review.

I THEREFORE MOVE that, pursuant to City Charter Section 245, the City Council assert jurisdiction over the Board of Fire Commissioners' May 6, 2025 action to approve an agreement with Clean Harbors Environmental Services, Inc., for hazardous materials waste management services pursuant to the Request for Proposals No. 2024-038-001, Board of Fire Commissioners File No. 25-019.

I FURTHER MOVE that upon assertion of jurisdiction, the matter be referred to Committee for further review.

The Project is located at 3552 East Whittier Boulevard in Council District 14 and will provide 63 units of affordable housing and one manager unit.

In accordance with the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) and as part of the bond issuance process, LAHD conducted the required public hearing on March 11, 2025. MOTION

As the City faces significant fiscal constraints and considers workforce reductions, it is critical to identify every opportunity to retain skilled employees, avoid layoffs, and preserve service delivery.

To prevent the loss of experienced City workers and minimize service disruption as much as possible, the City should examine whether employees at risk of layoff can be transferred, reassigned, or swapped into vacant, funded positions within other City departments—particularly where civil service classifications and qualifications align.

I THEREFORE MOVE that the City Administrative Officer (CAO) and the General Manager of Personnel Department, report weekly on the establishment of a standardized process for employee transfers and swaps to funded positions across departments, including identification of civil service classifications eligible for such exchanges, legal or contractual considerations, and potential benefits for recruitment, retention, and workforce development.
