CD 4, CD 6, CD 9 COMMUNICATIONS FROM THE PROPOSITION K – L.A. FOR KIDS

STEERING COMMITTEE (LAFKSC) and BOARD OF RECREATION AND PARK COMMISSIONERS (BOARD) relative to the rescission of Proposition K (Prop K) Grant Awards for the Slauson Recreation Center Lighting Project, Crystal Springs (Griffith Park) Ball Fields Project, and Strathern Wetlands Park Synthetic Soccer Field Project.

A. COMMUNICATION FROM THE LAFKSC

Recommendation for Council action:

1. APPROVE the request of the Department of Recreation and Parks (RAP) to rescind the following Prop K competitive grant awards and the related grant funding in the amount totaling \$1,498,000, pursuant to the Board's action on May 2, 2024:
 - a. Slauson Recreation Center for the lighting improvement of baseball and basketball areas in the amount of \$73,000 (Prop K 5th Cycle).
 - b. Crystal Springs (Griffith Park) for the construction of new ball field in the amount of \$425,000 (Prop K 7th Cycle).
 - c. Strathern Wetlands Park (aka Rory M. Shaw Wetlands Park) for the construction of a new synthetic soccer field in the amount of \$1 million (Prop K 8th Cycle).

B. COMMUNICATION FROM THE BOARD

Recommendation for Council action:

AUTHORIZE the General Manager, RAP, to request that the LAFKSC and the Council rescind the following:

- a. Prop K 5th Cycle grant award in the amount of \$73,000 for lighting improvement of baseball and basketball areas at the Slauson Recreation Center.
- b. Prop K 7th cycle competitive grant award for construction of new ball field in the amount of \$425,000 for the Crystal Springs (Griffith Park).

- c. Prop K 8th Cycle competitive grant award for construction of a new synthetic soccer field in the amount of \$1,000,000 for the Strathern Wetlands Park

Fiscal Impact Statement: The LAFKSC reports that there is no anticipated impact on the General Fund that would occur as a result of the recommended action as these are Special Funds. A subsequent report to City Council will recommend the reprogramming of these funds to qualifying Proposition K projects. The Board reports that by rescinding the Prop K award for Crystal Springs Ball Field, RAP will need to return the full grant amount of \$425,000 to Prop K. Prop K was used for the Environmental Impact Report (No. 14-061, March 5, 2014, and 16-095, April 20, 2016). Prop K expenditure, up to \$425,000, will be transferred to RAP's Special Fund, 302/89/89270K-CS. This amount will impact the RAP's Special Fund. There is no fiscal impact to RAP's General Fund for Prop K Slauson Recreation Center, Lighting Project, and the Prop K Strathern Wetlands Park, Synthetic Field Project since no Prop K were spent for these two projects.

CONTINUED CONSIDERATION OF SUBSTITUTE MOTION (McOSKER – PADILLA) and MOTION (McOSKER – RAMAN) relative to the contamination issues raised in the Better Watts Initiative (BWI) report, comprehensive plan to investigate the source of the lead exposure, repair for the affected areas in Watts, and related matters.

A. SUBSTITUTE MOTION (McOSKER – PADILLA) DATED OCTOBER 8, 2024

Recommendations for Council action:

1. REQUEST the City Attorney and INSTRUCT the Bureau of Sanitation (BOS), in coordination with the Los Angeles Department of Water and Power (LADWP), to investigate the status of Atlas Iron & Metal Co.'s legal requirement to upgrade its stormwater treatment system. This should include specifically what improvements to the stormwater management system have been made and the status of compliance with federal water pollution rules.
2. INSTRUCT the BOS and REQUEST the LADWP to coordinate with the Los Angeles School Unified District (LAUSD) and the BWI to immediately develop any additional testing strategies for pollutants currently present on-site at Atlas Iron & Metal Co. that could be impacting Jordan High School.
3. REQUEST the City Attorney to report to Council on recorded citations of illegal disposal of hazardous materials and waste and the status of any penalties incurred by Atlas Iron & Metal Co. in the last five years.
4. REQUEST the City Attorney to report to Council on the ability of the City to impose restrictions on operations on-site at Atlas Iron & Metal Co. as the City is investigating the facility. Additionally, the City Attorney should provide measures the City can impose on the operator, including, but not limited to

abatement of the use, injunctive relief, criminal or civil fines and penalties, and community mitigations, such as a fund, to provide assistance to environmentally sensitive areas in need and to prepare remediation plans for projects that revitalize environmental justice communities in Watts.

5. REQUEST the City Attorney to engage the California Attorney General and the United States Environmental Protection Agency (EPA) Administrator to share data related to sewer runoff and other samples collected from Atlas Iron & Metal Co. Additionally, the EPA should also pursue an investigation on the incidents associated with metal shrapnel coming from explosions on-site and the impact they have on the surrounding environment.
6. INSTRUCT the BOS, Citywide Brownfields Program, to work directly with Atlas Iron & Metal Co., community organizations, and City agencies to help assess, clean up, and revitalize any potential impacts that the site may have caused to 1.) the neighboring lots; or 2.) in the case that an agency acquires the site in the future, the City can directly deploy Brownfields Program resources for the site.

I **MOVE** that the matter of Planning and Land Use Management Committee report relative to a proposed Interim Control Ordinance (ICO) prohibiting the issuance of permits related to warehousing, distribution, and storage use in excess of 15,000 cumulative square feet within the Cornfield Arroyo Seco Specific Plan (CASP) area, adopted by the Council on June 28, 2024 (CF 13-0078-S3), **BE AMENDED** to **ADOPT** the **attached additional findings** and request the City Attorney to include them in the draft Interim Control Ordinance to address the public health, safety, and welfare issues related to self storage facilities that should be studied in the update to the CASP.

Additional Findings

Environment:

- Self-storage facilities and other structures, such as buildings, roads, and other infrastructure re-emit heat more than natural landscapes, which cause heat islands (See www.epa.gov/heatislands).
- Industrial areas emit anthropogenic heat, “human-made” heat released into the atmosphere through the use of buildings, vehicles, machinery, and people, and aggravate the urban heat island effect.
- The heat island effect causes temperatures to rise about 1-7 degrees Fahrenheit during the day and approximately 2-5 degrees Fahrenheit during the night.
- Anthropogenic waste heat emissions are generated by industrial, transportation, and building energy and exacerbate high land surface temperatures.
- Warehouse and storage buildings use more energy levels compared to other commercial buildings (See <https://www.eia.gov/consumption/commercial/pba/warehouse-and-storage.php>).

Aesthetics/Pedestrian Environment/Circulation:

- The ICO is necessary to study the intent of the CASP to promote pedestrian oriented and aesthetically pleasing neighborhoods in what has historically been an underserved vehicle oriented industrial area.
- Self-storage facilities are typically vehicle-oriented, with a lack of commercial or residential activity that foster pedestrian activity.
- Self-storage facilities often have large footprints and long, barren, and impermeable street walls that restrict pedestrian and vehicular circulation. Also hindering walkability and transit and active transportation access while having an unwelcoming aesthetic for pedestrians.
- The CASP is adjacent to the urban core of the city and the development of self storage facilities does not match the density of nearby uses.

MOTION

One of the simplest ways to mitigate the impacts of rising temperatures driven by climate change at a neighborhood level is increasing the urban canopy. The Bureau of Street Services' (BSS) Office of Forest Management is currently analyzing the tree canopy of neighborhoods throughout the City of Los Angeles to develop the City's first Urban Forest Management Plan (UFMP) to chart a path forward for the City's urban canopy. From BSS's existing tree inventory to the Los Angeles Urban Forest Equity Assessment Report and the research done by University of Southern California's Lusk Center's Neighborhood Data for Social Change, we can see an observable reality verified: historically affluent neighborhoods have substantially more tree canopy and are therefore more protected from the effects of climate change.

The Bureau of Street Services Urban Forestry Division has guidelines for which trees can be planted and where, dictated by factors like proximity to a fire hydrant, intersection, driveway, bus stop, or overhead utility lines. Due to the potential for trees to interfere with electrical lines, current BSS Urban Forestry Division tree planting guidelines limit the potential size of tree species in neighborhoods with overhead utility lines to smaller species that provide less shade cover. Utility lines that hang over the public right of way are far more common in lower income, more racially diverse neighborhoods compared to historically wealthy and racially homogeneous neighborhoods which are far more likely to have utility lines placed underground. Similarly, there tends to be a greater density of driveways and bus stops in low income communities compared to wealthier areas, which further limits the City's ability to add street trees to those areas most in need of increased shade.

The UFMP will include neighborhood-level strategies to increase canopy cover to combat these inequities but, in order to best bolster the impact of this work, we must consider all of the limitations placed on tree planting in the public right of way and examine how we can tweak, limit, or modify all current city practices and restrictions to equitably increase tree canopy coverage across Los Angeles.

I THEREFORE MOVE to instruct the Bureau of Street Services, in coordination with the Bureau of Street Lighting, Bureau of Engineering, the Department of Water and Power, and the Department of Transportation, to report on all state and city laws, policies, and procedures currently in place that limit the size, location, and species of tree planting in the public right of way.

I FURTHER MOVE that the aforementioned report should clearly stipulate what is required by state and/or federal law and what is city policy that goes beyond state or federal standards.

I FURTHER MOVE that Bureau of Street Services report back with tree planting and spacing modifications, design solutions that can prevent trees from damaging underground infrastructure, as well as tree pruning guidelines, that can increase the amount and size of trees that can be planted on public right of way.

I FURTHER MOVE that the Bureau of Street Services, in coordination with the Bureau of Engineering and Department of City Planning, be instructed to report back on updating all relevant street standards to increase the minimum box size required for tree planting for streets with wider sidewalks in order to maximize tree canopy.

MOTION

The Los Angeles Department of Building and Safety (LADBS) has authority to abate properties that constitute a nuisance, including hazardous or substandard conditions. This authority is stated in Division 89 and Division 90 of the Los Angeles Municipal Code (LAMC).

In a city as large as Los Angeles there are, unfortunately, many properties which are subject to Division 89 and Division 90 authority. However, the nuisance, hazard or substandard condition may not just be limited to the structure on the property. For example, when properties are deemed a nuisance, hazardous and/or substandard because of the over- accumulation of debris and other materials that occupy the property and exist outside of the structure it is necessary for LADBS to have clear authority to address those conditions.

To carry out property abatement LADBS often requires the assistance of other City departments and City contractors. It is essential for LADBS and the City to be able to properly mitigate properties and to have a clear timeline for abatement to convey to property owners and impacted community members. It is also critical for LADBS to have a process to demolish properties that continue to be nuisance.

I THEREFORE MOVE that the Council request the City Attorney, with the assistance of the Department of Building and Safety, to prepare and present an ordinance:

- Amending Division 89, Article 1, Chapter IX of the Los Angeles Municipal Code (LAMC), including but not limited to LAMC Section 91.8903, to clarify that the Department of Building and Safety may perform abatements under this section with the assistance of any other City department and their contractors, and to clarify language pertaining to the notice of intent, the commencement of work, and administrative appeals;
- Amending Division 90, Article 1, Chapter IX of the LAMC, including but not limited to LAMC Sections 91.9001, 91.9002, and 91.9003, to update references therein to other sections in the LAMC, specifically the Zoning Code, and to provide for a procedure by which properties subject to Division 90 that continue to be a nuisance may be declared a public nuisance by the Board of Building and Safety Commissioners and demolished in similar fashion to the procedures set forth in LAMC Section 91.8904 and 91.8907; and
- Amending any other relevant sections of the LAMC and Los Angeles Administrative Code to facilitate the above.
