Seminar

Child & Dog Safety

August 29th, 2009

K9's Only

18603 Topham St., Tarzana, CA 91335

According to the Center for Disease Control, 4.5 million Americans are bitten by dogs each year, and about 800,000 result in injuries that require medical attention. Of those, 50% percent are children. Children between the ages of 5 and 9 are the most likely to be bitten, and usually it is by a dog that the child knows. This is a hugely preventable problem when we put a focus on education and responsible dog ownership.

Bobby Dorafshar is an expert in child and dog relationships, and has been a forerunner in humane education in schools in Los Angeles County for more than 15 years. Now K9s Only wants to give you and your family a chance to benefit from his professional expertise by offering a free 1 ½ hour seminar on Child and Dog Safety.

TOPICS INCLUDE

- 🐾 What to do when approached by a stray dog.**
- 🐾 Spay/Neuter awareness, and more.**

Seminar has a limited number of seats available.
Please call 818-344-WOOF (9663) to reserve your space, or visit
