

~~PUBLIC SAFETY~~

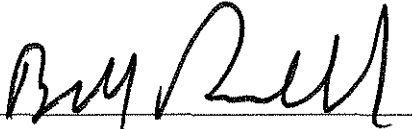

MOTION

~~PERSONNEL~~

The residents of the City of Los Angeles, their pets, and all animals in the city deserve to have the highest quality Department of Animal Services. The Department depends on its skilled and valuable workforce to care for the City's animals. Animal Services employees recently attended a meeting of the Los Angeles City Council to voice their concerns regarding the management of the Department. Due to Brown Act requirements, the discussion of the employees' concerns was limited. In order to have a thorough vetting of these allegations of departmental mismanagement, the Council should hold a public hearing where employees and members of the public may participate.

I THERFORE MOVE that the Personnel Committee hear testimony from employees of the Department of Animal Services, their representatives, and other members of the public regarding their concerns about the management of the Department and its relationship with its employees.
