

Ad Hoc Committee on the L.A. River: Publication Notice

The School of Architecture at the Royal University of Fine Arts in Stockholm recently completed a post graduate project on the Los Angeles River: The Fifth Ecology – Los Angeles Beyond Desire.

This report is part of an ongoing series called Cities and Energy- a three- year investigation of how necessary changes in energy consumption and production influence and inform our cities and our ways of life. The school examines the Los Angeles River as a post-material public space.

“ The Fifth Ecology will be a test ground for a post-material American dream. The Los Angeles River will be its point of departure.”

“The Fifth Ecology will be created in and around the river. This ecology will be distinctly urban, specific to Los Angeles, and will host humans, animals, lifestyles, infrastructure and waste. These will be formal and informal actors in Los Angeles’ great leap towards becoming a sustainable megacity. The Fifth Ecology will be its spectacular shop window.”
