SUMMARY

The Los Angeles City Fire Department (LAFD) recently entered into an agreement with the Governor's Office of Emergency Services (CalOES) to accept the temporary transfer of four Type VI fire engines and associated equipment. The LAFD previously entered into a similar agreement with CalOES in 2015 for the transfer of five Type III fire engines, which remain in service today. These agreements have proven highly beneficial by augmenting the City's resources. Acceptance of an additional Type VI engine further increases opportunities for state-level reimbursement for staffing under the California Fire Assistance Agreement and Pre-Positioning Authorizations and enables the LAFD to deploy a full Type VI Strike Team.

The addition of one more Type VI engine will strengthen the LAFD's ability to provide all-hazard emergency service, with particular effectiveness in wildland-urban interface vegetation fires. Type VI engines are smaller, equipped with four-wheel drive, and feature independent pumps that allow for mobile water application while driving. The CalOES Type VI engines and equipment will be strategically positioned across the City to ensure rapid deployment as either part of a strike team or as single resources. As State-owned resources, the fifth engine assigned to the LAFD will be designated as part of OES Strike Team (S/T) 1881F. Each apparatus carries a CalOES resource designation, which is prominently displayed on its exterior.

RECOMMENDATIONS

That the Board:

1. Approve the LOA(s) between the LAFD and CalOES allowing for the implementation of an additional Type VI fire engine and associated equipment for a period of ten years.
2. Transmit the LOA(s) to the Mayor in accordance with Executive Directive 3, and to the City Council for approval.
3. Request the City Council, subject to approval of the Mayor, approve the LOA(s) for the period of December 5, 2025, to December 5, 2035.

FISCAL IMPACT

The value of this vehicle is \$215,599.00, with assigned equipment valued at \$41,826.00. The total value of the fully equipped Type VI engine is \$257,425.00. There is no impact to the General Fund.

DISCUSSION

The integration of an additional Type VI fire engine into the LAFD's extreme weather deployment models will significantly enhance the Department's capacity for all-hazard emergency response, particularly in vegetation fires. Its smaller size, four-wheel drive, and pump-and-roll capability makes it especially effective in challenging terrain. Acceptance of this additional CalOES engine also expands the Department's fleet while providing access to staffing reimbursement through the California Fire Assistance Agreement. Additionally, staffing this apparatus will allow LAFD members to increase qualifications under the California Incident Command Certification System (CICCS), thereby advancing both operational efficiency and firefighter safety.

CONCLUSION

The acceptance of additional Type VI fire engine from CalOES represents a critical investment in strengthening the LAFD's operational capacity, enhancing firefighter safety, and improving the City's ability to respond to wildland and all-hazard incidents. This agreement continues the Department's successful collaboration with CalOES and ensures that Los Angeles is better prepared to meet the growing demands of emergency response while maximizing opportunities for state-level reimbursement and resource support.

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

From time to time, Carahsoft OBO California Governor's Office of Emergency Services (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a limited period of time (usually 30 days) after such documents are first sent to you. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.
