SUMMARY

The Office of the Independent Assessor (OIA) conducted a year-end review of the status of complaints against Los Angeles Fire Department (LAFD or Department) employees, closed in 2017. The OIA gathered and analyzed information from LAFD's Complaint Tracking System (CTS) and Discipline Tracking System (DTS). The OIA identified trends and issues, and made related recommendations.

RECOMMENDATION

That the Board:

1. Approve the OIA's Review of Los Angeles Fire Department Complaints Closed in 2017.
2. Adopt the OIA's recommendations.

DISCUSSION

363 cases were reviewed for this report. The OIA presented statistics related to these cases, such as the complaint category, whether the subject was a sworn or civilian member and to which bureau s/he was assigned, where a complaint was assigned for investigation, and how complaints were adjudicated. The OIA also discussed the number of cases that went out of statute. Further, for cases in which charges were sustained, the OIA presented the original discipline and the current status of the case, including whether a settlement agreement was executed. Additionally, the OIA found that 17 Boards of Rights are currently pending. 12 of those were pending at the end of 2017.

Finally, the OIA identified issues and made recommendations. Throughout this review, the OIA and the Department worked collaboratively to address the issues and the recommendations.

I am available to provide any additional information the Commission may require.

Respectfully submitted,

I. INTRODUCTION

This report is a year-end review of the status of complaints against Los Angeles Fire Department (LAFD or Department) employees closed in 2017. The OIA gathered and analyzed information from LAFD's Complaint Tracking System (CTS) and Discipline Tracking System (DTS). The OIA identified trends and issues, and made related recommendations.

The findings in this report supported recommendations previously adopted by the Board of Fire Commissioners (BOFC). During the course of the drafting of this audit, the Department and OIA worked cooperatively to implement some of the recommendations and began to implement the remainder. The Department will concurrently present its work to the BOFC in BFC No. 19-031.

The OIA thanks the Department, in particular members in Professional Standards Division (PSD), for their cooperation and assistance. Additionally, the OIA is grateful for the valuable counsel provided by lawyers in the office of the City Attorney.

II. PURPOSE

The purpose of this report was to review how the Department handled complaints of misconduct that were closed in 2017 and the impact of prior OIA recommendations.

III. OBJECTIVES

- A. Determine the number of cases filed annually 2009 through 2017.
- B. Determine the number of complaints closed in CTS in 2017.
 - 1. Determine the number of complaints by category.
 - 2. Determine the number of complaints by Bureau or Division.
 - 3. Determine whether a complaint was filed by a Department employee, an external complainant, or an anonymous complainant.
 - 4. Determine the number of complaints assigned to be investigated by Professional Standards Division, Chain of Command (Field) or the Alternative Investigative Procedure (Alternative Process).¹
 - 5. Determine the number of complaints by adjudication.
 - 6. Determine whether the subject was a sworn or civilian employee.
 - 7. Determine the status of sustained cases, including the number of settlement agreements.
- C. Determine the number of cases awaiting a hearing before a Board of Rights.

¹ In BFC No. 17-082, heard by the BOFC August 1, 2017, the BOFC approved an additional investigative process for complaints filed against the Fire Chief. However, the policy was not relevant to any of the cases in this audit.

IV. SUMMARY OF FINDINGS/ISSUES

The OIA determined that 363 cases were closed in 2017. After reviewing each individual CTS entry, the OIA made the following findings and identified the following issues:

- A. The Department does not have a written policy for categorizing cases as “sensitive” in CTS.

The Department is drafting a policy for determining which cases will be designated as “sensitive” in CTS.

- B. The Department did not categorize all Equal Employment Opportunity (EEO) complaints as EEO complaints. Therefore, investigations were not coordinated by the EEO Coordinator, as required by Department policy. The OIA identified this issue in a previous audit.²

As of March 2018, the Department changed the procedure for categorizing EEO complaints. As of January 1, 2019, a written policy accompanied this change.

- C. Similar complaints were categorized differently and complaint categories were numerous. This made it difficult to determine the total number of certain types of complaints. The OIA previously recommended the Department address these same issues.³

Beginning January 1, 2019, the Department implemented new policies that are beginning to bring consistency to CTS.

- D. Members were not required to follow Department policies for reporting lost or stolen equipment because the Department determined there was a conflict between two related policies and that one of the policy’s requirements was not necessary.

The Department is making revisions to its policies.

- E. The Department has reduced the number of cases determined to be out of statute.
- F. Sustained, Non-Punitive was the most prevalent finding/adjudication (169 cases, 46.4%). A previous recommendation by the OIA and response by the Department⁴ related to cases adjudicated as Sustained Non-Punitive are no longer necessary in light of a 2015 policy governing cases in which training, counseling or corrective action is more appropriate than discipline.⁵
- G. 36 (9.9%) cases were sustained and the member was disciplined. All of the disciplined members were sworn. None were civilians.
- H. After reviewing all cases currently open in DTS, the OIA determined 12 were awaiting a Board of Rights hearing at the end of 2017. These cases were reported to the Department as far back as

2011.⁶ In October 2016, the BOFC asked the Department to provide guidelines for completing Boards of Rights within a reasonable amount of time. The Department is working on drafting that guideline.

V. SCOPE AND METHODOLOGY

A. Cases Filed 2009 through 2017

Chart A (Page 5) shows the number of cases filed in CTS each year since 2009. The information from 2009 through 2012 was taken from a previous report written by the Department and presented to the BOFC on April 2, 2013.⁷ For years 2013 through 2017, the OIA ran reports in CTS and inspected each report to ensure all relevant cases were captured. Cases that were “Closed-Duplicate” or “Closed - Entry Error” were excluded.

B. Cases Closed in CTS in 2017

Three separate queries were made of the CTS system to gather all cases closed in 2017. First, the OIA ran a report for cases closed in 2017. This report yielded 361 cases. Next, the OIA ran a separate report for cases referred to the Alternative Process and closed in CTS in 2017.⁸ That report yielded three cases. A third report was run for cases marked “sensitive.” The CTS system does not allow a search for sensitive cases closed during a defined time period. Therefore, in order to calculate how many sensitive cases were closed in 2017, a report was run for all sensitive cases *filed* from January 1, 2009 through September 14, 2018. A total of 57 cases were found. Then a determination was made which of those were closed in 2017. Five of those cases were closed in 2017. The Department indicated to the OIA that, in the past, it did not have a written policy indicating which cases would be categorized as “sensitive.”⁹ The OIA recommended the Department draft an internal policy or procedure for determining which cases are categorized as “sensitive.” The Department is currently drafting that policy.

None of the reports included cases that were “closed-duplicate” or “closed-entry error.”

Six cases were removed from the population because they were determined to be duplicates, complaints that did not include active members of the LAFD, or was a case investigated by another City Department and reported to the Department only for information purposes.

Therefore, for this report, the OIA considered 363 cases closed in CTS in 2017.

The OIA inspected each individual CTS entry to determine how it applied to the relevant objectives. Except for case categories and adjudications, the OIA made an independent assessment for each objective. For example, in Case No. 235, a resident contacted a captain to make a complaint. In the CTS entry, the captain was designated as the complainant¹⁰ when in fact, the resident was the complaining party. In cases such as this, the OIA

⁶ As of March 5, 2019, a total of 17 cases were awaiting a Board of Rights.

⁷ BFC No. 13-047. Professional Standards Division Statistical Review 2012, heard by the BOFC April 2, 2013.

⁸ When CTS is queried for cases closed during a defined time period, the system excludes cases referred to the Alternate Process and cases marked “sensitive.” Reports for these cases have to be run separately.

⁹ The four cases marked sensitive that remained in the audit were case nos. 1, 2, 3 and 159. The fifth case was removed from the population because it was investigated by another City department.

¹⁰ The Department explained that when a captain in the field enters a complaint into CTS, the system auto-populates the captain as the complainant.

examined the information and concluded the resident was the complainant. The statistics presented in the report reflect this type of independent assessment.

Attachment A provides a summary of each original complaint and the final adjudication. The case numbers in this report refer to the numbers in Attachment A.

C. Pending Boards of Rights

In Section VIII.C., the OIA presented information related to pending Boards of Rights. This information was ascertained by running a report in DTS of all open cases, inspecting each individual case and determining which cases were awaiting a Board of Rights hearing at the end of 2017.¹¹

VI. PREVIOUS AUDITS

On September 5, 2017, the OIA presented the BOFC with an Audit of Los Angeles Fire Department Cases Closed in the Complaint Tracking System During First Quarter 2017.¹² Those cases were incorporated into this audit to give a complete overview of all cases closed in 2017. However, none of the cases highlighted in this report were featured in the earlier audit.

Further, on January 16, 2018, the OIA presented the BOFC with a Review of LAFD Emergency Medical Service Complaint Investigations Closed First Quarter 2017.¹³ Those cases were also captured in the population for this report, but were not repeated in any of the trends or issues highlighted in this report.

Additionally, the OIA conducted previous audits related to pending Boards of Rights (see section VIII.C.). The Audit of Los Angeles Fire Department Directed and Opted Boards of Rights 2009 through 2014¹⁴ and the Assessment of Los Angeles Fire Department Cases Pending a Member-Opted Board of Rights.¹⁵

VII. BACKGROUND

The findings in this audit were gathered from entries made in CTS and DTS. System limitations and lack of uniformity among system entries made it difficult to obtain accurate information directly from the reporting functions in CTS alone. Furthermore, the reporting functions are limited and not all the statistics provided in this report were available through those functions. Therefore, for this audit, OIA staff inspected each individual CTS entry and manually created a spreadsheet with the information relevant to the objectives in this audit. Most of the statistics presented in this report were gathered from the spreadsheet.

The Department reported to the OIA that when it is required to gather statistics for its own analyses, Department personnel also manually gather the information, rather than use the reporting functions available in CTS. For both the Department and the OIA this is a time consuming and burdensome task. The current state of CTS requires the OIA and the Department to spend an unreasonable amount of time and resources amassing

¹¹ If a case was open at the end of 2017, but closed by the time the report was run, it was not captured in the DTS report. However, the information was accurate as to cases still open as of December 15, 2018.

statistics and information that should be easily and quickly accessible through the report functions of a modernized and efficient database.

The OIA and Department have been working on ways to bring uniformity to the system. The BOFC adopted the OIA’s previous recommendations which were intended to address these issues. The OIA made similar recommendations in this report. Although the Department has begun to adopt policies and procedures which are positively impacting the system, more needs to be done. The OIA applauds the Department for its work in this area and looks forward to working with the Department as it continues its efforts.

VIII. DISCUSSION

A. Objective 1 - Determine the number of cases filed annually, 2009 through 2017¹⁶
With the exception of a slight increase in 2015, the Department has experienced a steady decline in cases reported over the last nine years.

CHART A: CASES FILED ANNUALLY 2009 - 2017

B. Objective 2 - Determine the number of complaints closed in CTS in 2017
Previous audits did not consider the information gathered for Objective 2. Therefore, the OIA could not assess year to year trends related to the statistics. However, this information will now provide a benchmark for future year-end reviews.

¹⁶For a number of years, PSD presented the BOFC with an annual report of statistics, however the last time this was done was in 2012. The cases were presented in a manner that does not allow for comparisons with the information presented in this report since PSD included an amalgamation of both open and closed cases in those reports. This report considers only cases closed in CTS. Statistics for years 2013 through 2017 were gathered by the OIA. Also important to note here, the number of cases filed annually does not correlate to the number of cases closed each year.

363 cases closed in CTS in 2017 were considered for this audit.

- One case was filed in 2011.
- Two cases were filed in 2014.
- Four cases were filed in 2015.
- 146 cases were filed in 2016.
- 210 cases were filed in 2017.

1. Objective 2a - Determine the number of complaints by category.¹⁷

The OIA identified the following issues related to the categorization of complaints in CTS.

a. Equal Employment Opportunity (EEO) complaints were not labeled as EEO¹⁸

The Department places great emphasis on providing a workplace free from discrimination, harassment, retaliation and hazing, and has a separate policy manual for addressing the rules and responsibilities related to these and other EEO issues -- The Discrimination Prevention Policy Handbook (DPPH). The Department maintains a zero tolerance policy for these acts.¹⁹

The OIA determined that not all cases initially reported as claims of discrimination, harassment, retaliation or hazing were categorized as EEO-related.

At the end of 2017, CTS showed a total of five cases considered as EEO or hazing allegations (see Chart B on Pages 10-12, highlighted in green). In the following cases, the complainant made explicit allegations of misconduct based on gender, race, ethnicity or hazing, but the Department did not categorize them as EEO cases.

- Case No. 68: The complainant alleged s/he experienced discrimination because s/he is Hispanic.
- Case No. 89: A member was denied the use of a Department vehicle to go to an assignment for an overtime day and alleged discrimination based on race.
- Case No. 161: It was alleged that a member made accusations and negative remarks about African American members.

Hazing cases:

- Case No. 96: Member A and Member B worked on a rescue together for several months. Member A reported that Member B was rude to the public and has no integrity. Member B allegedly told Member A that Member A was not wanted at the fire station by the other members of the crew. Member B sent Member A a photo of Member B making a vulgar gesture. Member B sent Member A group text messages, which included other crew members attempting to belittle and defame Member A. Member A reported this as hazing.
- Case No. 138: Member A and Member B had a verbal altercation while off-duty and Member B threatened Member A. Subsequently, Member A reported that two other members at the station spoke to Member A about transferring out of the station and engaged in an alleged retaliatory act. The supervisor who entered the complaint into CTS, suggested this behavior may meet the Department's definition of hazing.

¹⁷ These statistics were taken directly from a report run in CTS. No corrections were made by the OIA.

¹⁸ The OIA reported on this same issue in the Audit of Los Angeles Fire Department Cases Closed in the Complaint Tracking System During First Quarter 2017 (BOFC No. 17-097), heard by the BOFC on September 5, 2017.

¹⁹ Policy Statement, DPPH.

- Case No. 167: A member allegedly sounded an air horn in a dormitory where a probationary firefighter was resting.
- Case No. 344: A member alleged s/he was the victim of potential bullying and hazing.

According to the DPPH, the EEO Coordinator should coordinate investigations into complaints of sexual harassment, discrimination, retaliation and hazing. The EEO Coordinator also provides guidance to all members, including Officers, Managers, and Supervisors, on potential incidents of harassment, discrimination, retaliation and hazing.²⁰ However, EEO complaints that were not categorized as EEO were not referred to the EEO Coordinator (according to the information in CTS). Therefore, it appears the investigations in these cases were not coordinated by the EEO Coordinator, as required by the policy.²¹

In April 30, 2018, Mayor Eric Garcetti issued Executive Directive No. 23 (ED) regarding harassment and discrimination. In it, the Mayor stated, “As a City, we must administer policies and practices that prevent harassment and discrimination, as well as support those who wish to report their experiences.” The Mayor also stated, “Victims of harassment and discrimination face considerable barriers to filing formal complaints due to fear of blame, disbelief or retaliation.”²² As of December 15, 2017, all General Managers and heads of City departments must report incidents of sexual harassment involving employees within 48 hours of the incident or of the department becoming aware of the incident to ensure that “all incidents, regardless of reporting method, are counted, recorded, and investigated appropriately.” The Manager of the City Personnel Department’s Equal Employment Opportunity Division told the OIA that departments are expected to recognize and report these cases in a manner consistent with the initial allegations.

An incident report form was created specifically for LAFD to report incidents of “potential sexual harassment” to the City Personnel Department. LAFD reported to the OIA that the office of the City Attorney is consulted on all cases that are referred to the Personnel Department pursuant to the Mayor’s ED.

The Department reported that PSD previously had a practice of waiting to categorize complaints as EEO-related until after the Department interviewed the complainant, even if the initial complaint contained explicit allegations of EEO violations (such as a complainant reporting she suffered discrimination based on her gender). In March of 2018, the practice was changed. Incoming EEO complaints are now categorized as EEO-related at the time the complaint is received. If, through the investigation, it is determined that a preponderance of the evidence does not support the EEO allegation(s), the case is adjudicated to reflect the state of the evidence (Unfounded, Not Sustained, etc.). The OIA believes the current practice is a more accurate way of capturing the number of EEO complaints reported to the Department and applauds the Department for changing the procedures. Pursuant to the recommendation of the OIA, the Department drafted a written procedure memorializing this process. The written procedure includes a requirement that the City Attorney’s office be consulted to determine whether an allegation of sexual harassment must be reported to the Personnel Department in accordance with the ED.

²⁰ DPPH Section III.C. Fire Department Internal Procedures.

²¹ Case No. 161 was appropriately referred to the Alternative Process for investigation. The Department (with the assistance of the Office of the City Attorney) will have to determine the role of the EEO coordinator for cases referred to the Alternative Process.

²² Mayor Eric Garcetti Executive Directive No. 23 issued April 30, 2018, Subject: Harassment and Discrimination.

b. Similar complaints categorized differently

Below are examples of cases in which allegations of rude and unprofessional behavior (a member was discourteous) were made, but cases were categorized differently. This made it difficult to determine the total number of “discourtesy” cases reported to the Department in a given time period. Chart B (Pages 10-12) shows 22 ways cases were categorized when the complainant alleged a member was discourteous (highlighted in yellow). Ultimately it was determined that this was the second largest number of complaints closed in 2017. The Department has now written and implemented (as of January 1, 2019) procedures for categorizing Discourtesy, Assign Hire, and Driving Under the Influence complaints that bring consistency and uniformity to CTS. These changes will be reported to the BOFC concurrently with this report in BFC No. 19-031. The OIA applauds the Department’s efforts in this regard.

- Case No. 22: The complainant alleged that a member was rude, condescending and very unprofessional to a patient's caregiver. It was also alleged that the patient was not transported to the requested hospital, resulting in a medical setback to the patient. This case was categorized as Disrespectful/Insensitive/Negative attitude.
- Case No. 95: The complainant alleged that between June 2002 and December 2005, a member was rude and unprofessional to a patient. This case was categorized as Inappropriate/Unprofessional Comments.
- Case No. 141: The complainant alleged members were rude and unprofessional. This was categorized as an Improper Remark or Gesture (non-EEO).
- Case No. 157: The complainant (employed by another City department) alleged a member was rude and unprofessional. This case was categorized as an Improper Remark or Gesture (non-EEO).
- Case No. 212: The complainant alleged that members were unprofessional, showed no empathy, no compassion and no sympathy for the patient. It was also alleged that the members were sarcastic with the patient and family. This case was categorized as Disrespectful/Insensitive/Negative attitude.

c. Policies for reporting lost (or stolen) equipment were not followed

Cases categorized as “Lost Equipment” represented the largest number of cases closed in 2017. Department policies and procedures differ depending on the type of equipment that was lost or stolen. A different procedure is required when the following items are lost or stolen: 1) Inventory items, 2) LAFD identification, and 3) LAFD badge, cap piece, insignia, nameplate, belt buckle and tie bar.²³

The OIA determined that 85 cases were closed in 2017 that were designated “Lost Equipment.” In 59 of those cases (69.4%), the member misplaced an LAFD identification card (or it was reported stolen). This represented the largest category of items lost or stolen. Eight lost or stolen²⁴ badges represented the next largest category of lost or stolen items.

The OIA examined a sample (32) of the 59 lost identification cases to determine if the Department policy was followed. The policy requires members to file a loss (police) report with the law enforcement agency where the loss occurred and forward an F-225 (interdepartmental memo) to Personnel Services Section requesting a

²³ A separate procedure exists for lost or stolen identification issued by the Los Angeles International Airport (Manual of Operations Section 3/7-90.00).

²⁴ One member’s badge was lost when the member’s house burned down in a wildfire.

replacement. The F-225 must include a copy of the loss report and a statement of the facts from the member's immediate chief officer.²⁵

From the information available in CTS, the OIA determined that the Department followed the policy in two of the 32 cases. The OIA determined that the Department was diligent in ensuring that a police report was filed in these cases and that the member provided the Department with a copy of the police report before the member could seek a replacement from Personnel Services Section. However, the F-225 with a statement from the member's immediate chief officer was not provided. The Department explained that members were no longer required to submit an F-225 for two reasons. First, a 2008 Letter of Agreement (LOA) between the Department and United Firefighters Los Angeles City²⁶ created a conflict with the policy in the Manual of Operations. The Manual of Operations requires the F-225 be completed by the member's immediate chief officer. However, according to the LOA, the investigating officer (the person responsible for collecting the information for the F-225) for an incident of lost equipment is the member's immediate supervisor. The Department explained that the supervisor for most members is not a chief officer, therefore the Department believed there was a conflict between the requirement in the LOA and the Manual of Operations. Second, the Department believed the F-225 was no longer necessary since the police report generally provided sufficient information related to the circumstances of the lost/stolen equipment. Due to the perceived conflict between policies, the OIA recommends the Department consult with the office of the City Attorney to resolve the issue.

Furthermore, the OIA discovered that in 17 Lost Equipment cases, the member did not report the loss for at least 30 days after it occurred. Current policy does not include the time period by which a member must report the loss/theft to the Department.

While researching this report, the OIA brought the information about lost equipment cases to the attention of the Department. The OIA has been informed that the Department is currently revising the policies. The OIA recommends the Department revise the current lost equipment policies to reflect the Department's priorities for these cases and include a timeframe for reporting the loss or theft.

d. Complaint categories were numerous

Chart B (Pages 10-12) shows the number of complaints by category. The Department used 83 different categories to label the 363 complaints of 2017. Previously, the BOFC adopted the OIA's recommendation that the Department reduce the number of categories in CTS and define the complaint categories (in writing) and train members responsible for entering this information into CTS to ensure accuracy and consistency.²⁷ As mentioned above, the Department recently began defining complaint categories for certain types of complaints. The OIA encourages the Department to continue this effort for additional complaint categories.

²⁸ The location was determined by where the subject was working at the time of the incident. If the member was accused of misconduct while off duty, then the location of the member's regular assignment was used. For example, if a member was regularly assigned to Operations Valley Bureau, but was accused of making an improper remark or gesture to a patient while working overtime in Operations West Bureau, the statistics reflect OWB. However, if the same member was accused of misconduct while off duty, then the chart reflects OVB.

4. Objective 2d - Determine the number of complaints assigned to be investigated by Professional Standards Division, Chain of Command (Field) or the Alternative Investigative Procedure (Alternative Process).³¹

Professional Standards Division personnel determine whether a complaint is investigated by PSD, the chain of command (Field) or the Alternative Process. The 2008 Letter of Agreement between the Department and UFLAC indicated that cases related to performance, behavior, punctuality/absenteeism, driving/parking violations, and lost equipment “normally” will be investigated by the member’s immediate supervisor (Field). Complaints investigated by PSD are generally of a more serious nature, such as EEO-related allegations. The procedure for determining which cases are assigned to the Alternative Process was outlined in BFC No. 17-015, approved by the BOFC on February 7, 2017.³² The Alternative Process was created to avoid conflicts of interest with PSD personnel and to “maintain an unbiased, objective and transparent investigation.”³³ Cases were not assigned if a full investigation was not necessary to address the allegation(s). For example, lost equipment cases, cases addressed with training or counseling, traffic accidents filed in CTS for documentation purposes, assign hire cases, or cases sent to mediation, were not assigned for investigation.

After PSD determines the investigative path of a case, the case is referred to a designated individual responsible for assigning that case to an investigator. For example, each geographic bureau has a person responsible for assigning an investigator to each case that is referred to that bureau for investigation.

CHART E: ASSIGNED FOR INVESTIGATION

³¹ This information was gathered from the workflow and comment sections in CTS.

³² The scope of this audit did not include an assessment of whether cases were properly assigned for investigation nor why cases were not assigned for investigation.

³³ October 28, 2009 Memo from Commander, Internal Affairs Section to Commander, Professional Standards Division, entitled Alternative Investigative Procedure. The Department’s most recent Alternative Investigative Process is memorialized in BFC No. 17-015, heard by the BOFC on February 7, 2017.

³⁴ One of the cases referred to the Alternative Process was ultimately investigated by an outside agency. The referral to the outside agency was done through the Alternative Process.

5. Objective 2e - Determine the number of complaints by adjudication.^{35,36}

Sustained Non-Punitive	169
Exonerated	8
Non-Disciplinary	29
Non-Disciplinary-Mediated	2
Not Sustained	68
Unfounded	45
Out of Statute	7

³⁵ The following are the Department's definitions for adjudications.

- **Sustained:** Allegations are supported by sufficient evidence to conclude they are true, and an appropriate Departmental action was/will be imposed.
- **Not Sustained:** Insufficient evidence to either prove or disprove the allegations.
- **Exonerated:** Investigation indicates that the incident occurred but was justified, lawful, and proper under the circumstances.
- **Non Disciplinary:** Investigation indicates that the incident relates to the following categories: Alternative Complaint Resolution/Complaint Withdrawn or Retracted/Demonstrably False/Filed with Another Agency/Member Not Involved/Not Misconduct/Policy or Procedure/Referred to Another Bureau, Department, and Agency.
- **Unfounded:** Investigation indicates that the allegations are false.
- **Sustained, Non-Punitive:** Investigation indicates that the incident occurred, however it did not result in discipline against the member.

³⁶ The numbers total 364 not 363 because one case had two subjects and the adjudication was different for each subject -- Sustained, Non-Punitive for one and Not Sustained for the other.

a. *The Department has reduced the number of out of statute cases*

Table 1 shows the seven complaints that were adjudicated by the Department as Out of Statute and closed in 2017:³⁷

TABLE 1 - OUT OF STATUTE CASES

55	2016	PSD	Yes	This case was investigated and a report was submitted for adjudication in a timely manner; however, it was not adjudicated (Unfounded) until a day after the statute of limitations ran. ³⁸

In three cases, the Department did not assign an investigator. In three other cases, an investigator was assigned. One case was assigned to an outside agency for investigation and it is unknown what the investigative process entailed.

In 2016, the OIA reported on the Department's out of statute cases.³⁹ At that time, five percent of the Department's cases from a one-year period were determined to be out of statute. Here, only 1.9% of cases were reported as out of statute, representing a decrease of more than 50% in the number of cases that were out of statute. Furthermore, of the cases in this audit in which the statute of limitations expired in 2017, five (1.4%) were out of statute due to the Department's inaction. Although the OIA believes that all cases should be investigated and adjudicated within the statute of limitations, the statistics represent an improvement from the findings in the previous audit. PSD staff explained that PSD is ultimately responsible for ensuring that all PSD

³⁷ The OIA found at least two other cases that were out of statute but not adjudicated as such by the Department. Case No. 95 was adjudicated as Unfounded (it was determined to be out of statute at the time it was reported to the Department) and Case No. 240, adjudicated as Sustained and discussed below in Section VIII. B. 7. e. (Page 20).

³⁸ Although the OIA reached out to the Department for further explanation, the Department did not respond.

³⁹ BFC No. 16-049. Audit of Los Angeles Fire Department Out of Statute Cases, Office of the Independent Assessor, heard by the BOFC May 17, 2016.

and all Field cases are investigated within the one-year statute of limitations. However, once a case is designated for the Alternative Process, PSD no longer has responsibility for the case.⁴⁰ Therefore, of the seven cases that were out of statute, only five went out of statute due to the inaction of the Department and PSD was ultimately responsible for only four.

The OIA applauds the Department for the progress made regarding out of statute cases. The Department reported that its initiative of embedding a PSD liaison within the geographic bureaus (which began in 2017) to assist with Field investigations has helped reduce the number of cases that were not investigated within the one year statute of limitations.

b. Sustained, Non-Punitive was the most prevalent finding/adjudication

The OIA found 169 (46.4%) cases were adjudicated as Sustained, Non-Punitive, the largest number of adjudications.⁴¹ Sustained, Non-Punitive is defined by the Department as an investigation which indicated that the incident occurred, however, it did not result in discipline against a member. When a case is adjudicated Sustained, Non-Punitive, generally the subject receives a letter which states in part, “although the investigation found evidence beyond a preponderance that the allegation(s) did occur, the Department has determined that the imposition of punitive action is not warranted. Instead, the matter will be referred back to your chain of command for appropriate corrective action, which may include, but is not limited to counseling, training or action other than punitive action.” The letter continues, “[c]omplaints closed as Sustained, Non-Punitive cannot be used as a prior offense when determining future discipline. However, the Department can cite this finding in future investigations of similar conduct to show that you are on notice that the behavior is unacceptable and constitutes misconduct.”

In a previous audit (BFC No. 17-097),⁴² 25% of the cases were adjudicated as Sustained, Non-Punitive, the largest percentage of adjudications of cases in that audit.⁴³ At that time, the BOFC adopted the OIA’s recommendation that the Department create written guidelines for determining the types of cases for which Sustained, Non-Punitive is an appropriate adjudication. Subsequently, the Department reported to the BOFC on March 6, 2018, that the Department concurred with the OIA’s recommendation and was currently conducting research and developing written guidelines that will delineate which cases justify Sustained, Non-Punitive as an appropriate adjudication.⁴⁴

However, the Department recently reminded the OIA that the BOFC approved a procedure in 2015 for identifying and resolving non-disciplinary complaints at intake without investigation (BFC No. 15-108).⁴⁵ In that report, the Department identified and defined the types of cases for which “non-disciplinary measures such as counseling, training, or corrective action short of punitive action are appropriate remedies to correct the

⁴⁰ The case becomes the responsibility of the Deputy Chief to whom it is assigned (BFC No. 17-015).

⁴¹ 81 (47.92%) of the cases adjudicated Sustained, Non-Punitive were lost equipment cases.

⁴² Audit of Los Angeles Fire Department Cases Closed in the Complaint Tracking System During First Quarter 2017, Office of the Independent Assessor, heard by the BOFC September 5, 2017.

⁴³ None of those cases were Lost Equipment cases.

alleged behavior without the need for an investigation and formal punishment.”⁴⁶ The report included a procedure for developing, approving, implementing, and documenting the counseling, training or corrective action.

The OIA believes that this process addresses the previously articulated issues and recommendations and that no further action is needed by the Department (except to follow the policy articulated in BFC No. 15-108) as it relates to the previous recommendation.

6. Objective 2f - Determine whether the accused member is a sworn or civilian employee.

CHART G: SUBJECT MEMBER - SWORN, CIVILIAN OR UNABLE TO DETERMINE

7. Objective 2g - Determine the status of sustained cases, including the number of settlement agreements.

Of the 363 cases closed in 2017, charges were sustained and discipline⁴⁷ was imposed in 36 cases (9.9%). In all of the sustained cases, the accused was a sworn member, none were civilian.

a. Directed Board of Rights

- In seven cases (19.44% of sustained cases), the member was directed to a Board of Rights (involving six members - one member had two cases).
 - Six cases were settled (involving five members - one member had two cases).
 - Of the six cases, two were settled after the Board of Rights had convened.

⁴⁶ Id.

⁴⁷ Discipline (punitive action) is defined in California Government Code Section 3251(c) (Firefighters Bill of Rights) as dismissal, demotion, suspension, reduction in salary, written reprimand, or transfer for purposes of punishment.

- The member with two cases ⁴⁸ eventually did not comply with the provisions of the settlement agreement and ultimately resigned.

- One member resigned.

b. Suspensions

- 12 members were given suspension days (involving 11 cases, 30.55% of sustained cases). One case involved two members.
 - Four members accepted the suspension days.
 - Seven members settled their case.
 - One member requested a Board of Rights, was found guilty of the charges by the Board of Rights, suspension days were imposed, and the member served the suspension days.

c. Reprimands

16 members were given a written reprimand. Only one member filed a grievance (appeal).⁴⁹ The grievance was denied and the reprimand was placed in the member's personnel file.⁵⁰

d. Resignation

One member resigned before being formally charged.

e. Out of Statute

In case no. 240, the Department found a preponderance of the evidence demonstrated that the allegations were true, and sustained charges against the member; that the member failed to report for duty on an assign hire day. However, the statute of limitations expired before a penalty could be imposed. The Department explained that approximately 18 months earlier, the member had a previous case in which similar charges were sustained. In the previous case, the member received a written reprimand. During the investigation of case no. 240, the Department determined that, due to the lack of a consistent policy, the member should not have received a reprimand in the first case. However, after consulting with the City Attorney's Office, the Department allowed the discipline to remain in place since the member agreed to and signed that reprimand.

While the Department was contemplating how to proceed with both cases, the Department did not act in case no. 240 within the one-year statute of limitations, and therefore could not impose discipline, even though the charges had been sustained.

f. Settlement Agreements

A settlement agreement was executed in a total of 13 cases (36.1% of sustained cases).

Table 2 shows the original and final disposition of the sustained cases.

⁴⁸ The member's settlement agreement involved a total of three cases. However, only two were closed in 2017 and were included in the population of cases for this audit. The third case was closed in 2015.

⁴⁹ A Letter of Agreement between UFLAC and the Department identifies the grievance process as the appeal procedure for a member who wishes to challenge or appeal a written reprimand.

⁵⁰ The Department reported to the OIA that all reprimands were placed in the respective member's personnel file.

C. Objective 3 - Determine the number of cases awaiting a hearing before a Board of Rights, at the end of 2017.

In 2016, the OIA reported that the Fire Chief was committed to addressing 56 cases which were awaiting a Board of Rights hearing as of June 30, 2015.⁶² In 50 of the 56 cases, the member opted for a BOR. In the remaining six, the member was directed to a BOR. By June 30, 2016, the Department had reduced the number of pending member-opted BORs to 18.^{63,64}

Of the cases that are currently open in the Discipline Tracking System, 12 cases (representing nine members) were awaiting a BOR hearing at the end of 2017.⁶⁵ Seven of the cases were open at the time of the OIA's previous audits. Of the cases that are still open:

- One case was filed in 2011 and the BOR was requested in 2012.
- One case was filed in 2012 and the BOR was requested in 2013.
- One case was filed in 2013 and the member was directed to a BOR in 2014.
- Five cases were filed in 2014. In one case the member requested a BOR in 2014. In three cases the member requested a BOR in 2015. In one case the member was directed to a BOR in 2015.
- Four cases were filed in 2015. In all four the member requested a BOR in 2016.

One case has been pending for seven years, another for six years, two for four years, and so on. On October 18, 2016, the Department presented its response to the OIA's audit of directed and opted BORs.⁶⁶ At that time, the BOFC asked the Department to propose a policy setting forth timelines in which the Department will complete cases awaiting a Board of Rights hearing.⁶⁷ The Department has not presented a policy proposal to the BOFC, but is developing that policy.

Table 3 shows the current status (as of March 5, 2019) of cases that were awaiting a Board of Rights at the end of 2017.

⁶² BFC No.16-015. Audit of Los Angeles Fire Department Directed and Opted Boards of Rights 2009-2014, heard by the BOFC on February 16, 2016.

⁶³ BFC No. 17-050. Assessment of Final Dispositions of Los Angeles Fire Department Cases Pending a Member-Opted Board of Rights, heard by the BOFC on April 18, 2018.

⁶⁴ BFC No. 17-050 did not consider cases in which a member was directed to a BOR.

⁶⁵ Four additional cases were added to this number in 2018, bringing the current total to 17 cases awaiting a BOR, as of March 5, 2019. Of the 17 cases, one BOR is in progress.

⁶⁶ BFC No. 16-113.

⁶⁷ During the BOFC's discussion of BFC No. 16-113, on October 18, 2016, the Commission Vice President stated that five years between the time a BOR is requested and the time the BOR convenes is too long.

IX. RECOMMENDATIONS

The OIA recommends that the BOFC adopt the following recommendations and require the Department to coordinate with the OIA and provide progress reports to the BOFC at regular intervals on the implementation of the adopted recommendations.

1. The OIA recommends the Department write an internal policy or procedure for categorizing cases as “sensitive.”
2. The OIA continues to recommend that the Department implement a new case management system (or upgrade the current system) and, in the meantime, continue to develop written procedures to bring uniformity and consistency to the system. The Department has drafted internal procedures related to three categories of complaints (Assign Hire, Driving Under the Influence, and Discourtesy) which were implemented as of January 1, 2019. The Department should draft additional procedures for other complaint categories.
3. The OIA recommends the Department write an internal procedure for categorizing EEO complaints, consistent with the Department’s current practice of categorizing these complaints at the time they are submitted (rather than waiting until the complainant is interviewed) and consistent with the allegations at the time the complaint is made. The protocol (or a different written protocol) should include the Department’s practice of consulting with the Office of the City Attorney regarding cases referred to the Personnel Department pursuant to Mayor Garcetti’s Executive Directive No. 23.
4. The OIA recommends the Department revise the current policies and procedures for reporting lost or stolen equipment to reflect the Department’s priorities and include a timeframe for reporting the loss or theft. The revisions should be submitted to the BOFC for review and approval.
5. On October 18, 2016, the BOFC requested the Department draft and present a guideline outlining a reasonable time period by which all cases pending a BOR hearing are to be completed. The OIA recommends the Department create this guideline and present it to the BOFC for review and approval.
