## Roll Call

### 1. Complete Streets Design Guide Modification

Addition of the HLA Standard Elements Table as a supplemental document to the Complete Streets Design Guide. Reference Council File No. 24-0173.

(Attachment: [Staff Recommendation Report](#))

Recommendation for Street Standards Committee action:

1. FIND, based on the independent judgment of the decision-maker, after consideration of the whole of the administrative record, that the project was assessed in the previously certified Mobility Plan Environmental Impact Report No. ENV-2013-0911-EIR, SCH No. 2013041012, certified on August 11, 2015, and including the First Addendum (ENV-2013-0911-EIR-ADD1, dated December 3, 2015) and the Second Addendum (ENV-2013-0911-EIR-ADD2, dated March 2016); and pursuant to CEQA Guidelines, Sections 15162 and 15164, no subsequent EIR, negative declaration, or addendum is required for approval of the project.
2. ADD the HLA Standard Elements Table, attached as Exhibit A of the Staff Recommendation Report, as a supplemental document to the Complete Streets Design Guide.

Sign language interpreters, assistive listening devices, or other auxiliary aids and/or other services must be requested 72 hours prior to the meeting by contacting [planning.mobility@lacity.org](mailto:planning.mobility@lacity.org).

### **Telecommunication Relay Services**

Telephone communication is one of the most important forms of communication in society today. Due to advancements in technology, telephone devices have evolved with new services and capabilities. Individuals who are deaf and hard of hearing, and individuals with a speech disability are following these trends and are rapidly migrating to more advanced telecommunications methods, both for peer-to-peer and third-party telecommunications relay service (TRS) communications.

Telecommunications Relay Service is a telephone service that allows persons with hearing or speech disabilities to place and receive telephone calls. TRS is available in all 50 states, the District of Columbia, Puerto Rico and the U.S. territories for local and/or long distance calls. TRS providers - generally telephone companies - are compensated for the costs of providing TRS from either a state or a federal fund. There is no cost to the TRS user.

What forms of TRS are available? There are several forms of TRS, depending on the particular needs of the user and the equipment available: TRS includes: Text to Voice TTY-Based TRS; Speech-to-Speech Relay Service; Shared Non-English Language Relay Service; Captioned Telephone Relay Service; Internet Protocol Relay Service; and Video Relay Service. Please visit this site for detailed descriptions, <https://www.fcc.gov/consumers/guides/telecommunications-relay-servicetr>.

Don't hang up! Some people hang up on TRS calls because they think the Communications Assistant (CA) is a telemarketer. If you hear, "Hello. This is the relay service ..." when you pick up the phone, please don't hang up!

You are about to talk, through a TRS provider, to a person who is deaf, hard-of-hearing, or has a speech disability.

For more information about FCC programs to promote access to telecommunications services for people with disabilities, visit the FCC's Disability Rights Office website.
